

Gaming Speakers 77W

Premium Sound Configuration for Gaming

In the midst of your gaming world lies an incredible auditory journey. Trinity speakers are the guide through this adventure. Game audio is distinct from home theater or any other audio types, and your speaker system must be attuned to this world. No warrior steps onto the field of combat without a weapon of resonance. Trinity prolongs optimal sounds long after your game is finished. Configured specifically for gaming environments, you'll encounter crystal clear high frequencies and rich throaty bass sounds with lessened distortion. This is the sound of gaming come to life.

Assassin Mode

The essence of any game is lived through its audio. Living that passion is the design behind the Trinity Gaming Speakers. One feature in particular, Assassin mode, expresses this concept so clearly. Enable Assassin mode and experience exquisite detail and clarity for high frequencies, dynamic bass and warm mid-tones. The balance between bass tones and high tones remains constant across playing intensities whether you prefer to slay the house down or keep the sweet spot low and quiet. Brandish Assassin mode and surround yourself with the sounds of battle, encased in a soul pounding audio experience.

Independent Bass and Treble Adjustment

Here comes the latest game with an unheard of audio backdrop, but your speakers are designed for monotone. What you need is a set of speakers designed for your listening experience. Trinity delivers adjustable treble and bass controls for treble to produce an exceptional balance between the treble (upper), midrange, and bass (lower) frequencies, producing full, rich sound without losing detail. Your games are as unique as your audio tastes. Arm yourself with the Ballista Trinity speakers and tune in, not out.

Three-Way Satellite Speakers

You don't play a game with your eyes closed, so why would you use speakers that lack an audio punch. Armed with a discrete crossover network, Trinity delivers incredible low frequencies and crisp, exhilarating midrange tones. With a generous 6.5" subwoofer, 2.75" drivers and a custom designed 1" tweeter, the 2.1 speakers are engineered to reproduce every single breath, desperate gulp, or tooth-grinding chill. When the score is powerful, your gaming isn't complete without Trinity on your side.

Scenario

Specifications

System	2.1 Channel
